***Election/Restrictions***

Applicant's election with traverse of II, species 4 in the reply filed on 08-15-2006 is acknowledged. The traversal is on the ground(s) that it would not be unduly burdensome to examine all the claims. This is not found persuasive because additional claims with additional limitations, along with different specific manners of use would need to be searched along with those elected.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-30,38,48,49,53-55,65,66 and 76 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention and/or species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 08-15-2006.

***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the specification does not provide antecedent basis for "the guiding surfaces having less curvature than the unstressed legs, or the flexible sheet encircling the lens optic.

***Claim Objections***

Claims 31,46,61 and 79 are objected to because of the following informalities:

In claim 31, it is unclear what makes up the claimed lens guiding arrangement for the embodiment of fig. 4. In claim 46, the package 410 includes a fixture, not the seat. In claim 51, the keying structures are on the package, not the guiding surfaces.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 31-37,39-47,50-52,56-64,67-75 and 77-80 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 31 and 75, there is no antecedent basis for "its guiding structure".

In claim 33, it is unclear if the haptic planes are being positively recited.

In claim 41, there is no antecedent basis for "the lens mobility".

In claim 60, there is no antecedent basis for "the lens movement direction".

In claims 61 and 79, there is no antecedent basis for "the movable parts".

In claim 70, there is no antecedent basis for "the transfer opening" and "the tube".

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the fixture arrangements of claim 47, the flexible sheet of claim 74 and the automated handles must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 31-37,39-42,44-47,50,56-58,60-64,67-75 and 77-80 are rejected under 35 U.S.C. 102(b) as being anticipated by Kelman-5190552.

Kelman discloses an IOL injector for receiving an IOL with haptics 42. The IOL is placed on a seat 33 with the haptics placed into guiding surfaces 34 and when it is pushed forward by a lens guiding arrangement 10,14, the haptics are driven up ramped guiding surfaces 11. A handle attached to a pusher and the IOL cartridge act to inject the IOL into the eye.
